Our greatest resource is each other.

UM SKILLBRIDGE: CURRENCY-FREE PEER UPSKILLING

Deploying Time-Banking & Peer-Assisted Learning Theory (Vygotsky's ZPD & Social Exchange Theory)

1 THE CAMPUS DILEMMA

- **$** High costs: External courses and private tutors are unaffordable for many students.
- Academic silos: Computing, Business, and Language students rarely collaborate.
- Skill gaps: CS students need pitching and design; non-CS students need Python and tech.

2 THE ZERO-BUDGET LOOP

1. Sign up with UM Siswamail via Google Forms
2. Get skill-matched using Google Sheets / Notion directory (proposed automation)
3. Meet in approved UM Central Library discussion zones or on Google Meet
4. Earn & spend SkillCredits: 1 hour teaching = 1 hour learning

3 ETHICAL GUARDRAILS

Safety: Verify UM Siswamail; use daytime public meeting spaces.

Fairness & anti-burnout: 2-hour weekly tutoring cap; coach concepts, never complete graded coursework.

Fast burden: aim for automated matching and student-led moderation; PEKOM/UMSU involvement is proposed, not confirmed.

4 IMPACT

- Break faculty silos
- Democratize Academic & technical skills
- Build reciprocity
- RM0 new budget.

Our greatest resource is each other.

Proposed pilot concept — not an existing UM service.
